Assistant Director for Operations

1 March 1951

Chief, FBID

Progress report for February 1951

1. The monitoring and press scrutiny project at Saigon commenced operations on 16 February. Due to restricted communications facilities the file from Saigon to Washington is presently limited to 1500 words daily. An increase in this ceiling is expected in March.

2. On 15-16 February the German Bureau moved from Bad Nauheim to their new location in Frankfurt. This move was accomplished without interruption to the functioning of the bureau.

3. A survey team from Reseda has investigated possible sites for the relocation of the West Coast Bureau and submitted their recommendations. After this report has been reviewed, Division recommendations will be made as to sites where reception tests should be conducted.

4. The following special reports were prepared for the White House:

"Foreign Radio Reactions to the UN Action Concerning Chinese Aggression," 2 February.

"Foreign Radio Reactions to the UN Decision Concerning Chinese Aggression and to the Reports of General Eisenhower," 5 February.

"Communist Radio Reactions to the UN Decision Concerning Chinese Aggression," 7 February.

Text of Stalin's Pravda Interview, 17 February.

"Foreign Radio Reactions to the Interview With Pravda of Marshal Stalin," two reports, 19, 20 February.

"Soviet Radio Reactions to Stalin's Interview With Pravda," 21 February.

A special report prepared for IAC dissemination was entitled "Critical Indicators in Yugoslav-Cominform Propaganda: An Interim Report," No. 6 February.

5. A substantial portion of the Cyprus file transmitted to London is being intercepted by the East Coast Bureau and experimentally patched through to Headquarters on a private line which has been installed. It is believed that a considerable timesaving in the receipt of part of the Cyprus file will be achieved as well as a reduction of burden on Army Signals and possibly a native staff saving in London.

6. Five sets of equipment, each containing among other items, three receivers, two recorders, three transcribers, one portable generator and a jeep, have been requisitioned. A set will be shipped to each bureau in Tokyo, Cyprus, London, [] and on Okinawa to be held in reserve for emergency operation.

7. Regular use of graphic material illustrating quantitative determinations has been introduced in two publications, "Trends and Highlights of Moscow Broadcasts" and "Survey of USSR Broadcasts." The appearance of the former publication has been improved and composition facilitated by the adoption of the "paper plate" multilith reproduction process.

8. A table of contents for Chinese material was added to the Far East section of the Daily Report.

9. The "P" wire initiated a roundup of current news highlights for each eight-hour period. These roundups are filed at approximately 0800, 1600 and 2400 hours.

10. The Operational Information Report and Personnel Report for February are attached.
